

Cybertech AI-based Ethical Hacking course

☎ *Call / WhatsApp:* 9563366057

📍 *CyberTech Computer Center*

Chakbhabani Ghoshpara, Balurghat, Dakshin Dinajpur, West Bengal

আজকের ডিজিটাল যুগে **Cyber Security** শুধু একটি সাধারণ **Computer Course** নয়—এটি আপনার ক্যারিয়ার সুরক্ষিত করার *সবচেয়ে বড় সুযোগ*। **AI**-এর এই দ্রুত পরিবর্তনশীল যুগে **practical skills**-এর গুরুত্ব অপরিসীম।

💡 কেন **CyberTech Computer Center** বেছে নেবেন?

- *  ***Direct Learning from Bikram Sir:*** গাইডলাইন পান সরাসরি বিশেষজ্ঞের কাছ থেকে।
- *  ***AI + Cyber Security Automation:*** AI ব্যবহার করে সিকিউরিটি অ্যানালাইসিস শিখুন।
- *  ***100% Practical & Lab-Based Learning:*** শুধু থিওরি নয়, বাস্তবে শিখুন **Hands-on Practice**-এর মাধ্যমে।
- *  ***বাংলা, Hindi ও English Batch:*** আপনার সুবিধাজনক ভাষায় শেখার সুযোগ।
- *  ***Online & Offline Class:*** Balurghat Center-এ এসে অথবা বাড়ি বসে অনলাইনে ক্লাস করুন।

(Installment facilities available)**

 সম্পূর্ণ কোর্স সিলেবাস **(FULL COURSE SYLLABUS)**

 COURSE 1: CyberTech Ethical Hacking & Cyber Security — Foundation to Practical

ফি:  **Course Fee: ₹15,000**

 **Duration: 6–12 Months**

উদ্দেশ্য: একদম **beginner** থেকে **Ethical Hacking**-এর **practical foundation** তৈরি করা।

*** *Module 1 — Computer & Cyber Security Foundation***

*** Computer Fundamentals**

*** Operating System Basics**

*** Windows & Linux Fundamentals**

*** Cyber Security কী ও কেন?**

*** Hacker-এর বিভিন্ন ধরন**

*** Ethical Hacker বনাম Malicious Hacker**

*** Cyber Security Career Overview**

*** Cyber Security Ethics & Legal Boundaries**

*** *Module 2 — Networking Fundamentals***

*** Network কী? LAN / WAN / MAN**

- * IP Address, Public vs Private IP, IPv4 & IPv6**
- * MAC Address, Subnet Mask, Gateway & DNS**
- * TCP / UDP, Common Ports, HTTP / HTTPS**
- * OSI Model & TCP/IP Model**
- * Basic Network Troubleshooting**
- * *Module 3 — Linux for Ethical Hackers***
- * Linux Installation / VM**
- * Kali Linux Introduction**
- * Terminal Fundamentals**
- * Files & Directories, Users & Permissions**
- * Processes & Package Management**
- * Networking Commands & Bash Basics**
- * Essential Security Tools**
- * *Module 4 — Reconnaissance & OSINT***
- * Passive & Active Reconnaissance**
- * Domain Information & DNS Enumeration**
- * WHOIS Concepts & Subdomain Discovery**
- * Email/Username OSINT & Search Engine Intelligence**
- * Basic Shodan concepts, SpiderFoot & Maigret Introduction**
- * OSINT Reporting**
- * *Module 5 — Network Scanning***
- * Nmap Fundamentals & Host Discovery**
- * Port Scanning, Service Detection & OS Detection**
- * Basic NSE & Zenmap**

- * Understanding Scan Results & Vulnerability Identification**
- * *Module 6 — Web Security Fundamentals***
- * How Websites Work (HTTP Request/Response, Cookies, Sessions, Authentication, Web Parameters)**
- * OWASP Top 10 Introduction**
- * SQL Injection Concepts & XSS Concepts**
- * CSRF Concepts & File Inclusion Concepts**
- * Security Misconfiguration**
- * *Module 7 — Web Security Lab***
- * DVWA Setup & OWASP Juice Shop Introduction**
- * OWASP ZAP Introduction**
- * Request Interception & Parameter Testing**
- * Vulnerability Identification**
- * Basic Burp Suite Concepts & Lab-Based Practice**
- * *Module 8 — Python for Cyber Security***
- * Python Basics (Variables, Data Types, Conditions, Loops, Functions, Files)**
- * Requests & Basic Networking with Python**
- * Simple Security Automation**
- * *Module 9 — Practical Projects***
- * Network Reconnaissance Project**
- * Website Security Assessment**
- * OSINT Investigation Project**
- * Python Security Automation Project**
- * Vulnerability Assessment Report**

🎯 Course Outcome: শিক্ষার্থী Cyber Security-এর foundation, Linux, networking, reconnaissance, scanning এবং basic web-security testing সম্পর্কে practical ধারণা পাবে।

🟦 COURSE 2: CyberTech Professional Ethical Hacker (Advanced Web + Network + Python + AI)

***ফি: ₹💰 Course Fee: ₹35,000**

🕒 Duration: 12–18 Months

উদ্দেশ্য: Foundation-এর উপর professional-level penetration testing এবং security assessment skill তৈরি করা।

*** *Module 1 — Advanced Networking***

*** Advanced TCP/IP & Subnetting**

*** VLAN Concepts, Routing, NAT, DHCP, DNS Security**

*** Network Services, Firewall Concepts, Proxy, VPN Concepts**

*** Network Traffic Analysis & Wireshark**

*** *Module 2 — Advanced Linux***

*** Linux Administration & Bash Scripting**

*** Users & Groups, Permissions, Services, Logs, Cron Jobs**

*** SSH & System Hardening**

*** Linux Security Troubleshooting**

*** *Module 3 — Advanced Recon & OSINT***

*** Advanced Google Dorking & Subdomain Enumeration**

*** DNS Enumeration & Technology Fingerprinting**

*** Certificate Intelligence, Username Enumeration & Email Intelligence**

*** Shodan, SpiderFoot, Maltego Concepts**

*** OSINT Investigation Workflow & Automated Reconnaissance**

*** *Module 4 — Advanced Nmap***

*** Advanced Port Scanning & Service Enumeration**

*** Version Detection & OS Detection**

*** NSE Scripts & Firewall/IDS-aware scanning concepts**

*** Network Mapping, Automated scanning & Professional scan reporting**

*** *Module 5 — Web Application Penetration Testing***

*** OWASP Top 10 Deep Dive**

*** Authentication Testing & Authorization Testing**

*** Session Security & Input Validation**

*** SQL Injection, XSS, CSRF, IDOR**

*** File Upload Security, SSRF Concepts, XXE Concepts**

*** Command Injection Concepts, Path Traversal**

*** Security Headers & API Security Fundamentals**

*** *Module 6 — Burp Suite Professional Workflow***

*** Proxy, Repeater, Intruder, Decoder, Comparer, Scanner Concepts**

*** Request Manipulation**

*** Authentication Testing & Session Testing**

*** API Testing & Automated Testing Workflow**

*** *Module 7 — OWASP ZAP***

*** ZAP Proxy & Spidering**

*** Active/Passive Scanning**

*** Context, Authentication, API Testing**

*** Automation & Reporting**

*** *Module 8 — Vulnerability Assessment***

- * Vulnerability Identification, CVE Concepts, CVSS
- * Vulnerability Validation & False Positive Identification
- * Risk Classification & Professional Security Reports
- * ***Module 9 — Python for Security Automation***
- * Advanced Python (Requests, JSON, APIs, Regex)
- * Web Scraping Concepts, Socket Programming, Multithreading
- * Automation Scripts & Security Tool Development
- * ***Module 10 — AI for Cyber Security***
- * Generative AI Fundamentals
- * AI-assisted Reconnaissance & Log Analysis
- * AI-assisted Security Research
- * Prompt Engineering for Security Workflows
- * AI-assisted Python Coding & Security Report Generation
- * AI limitations, verification & Responsible use of AI
- * ***Module 11 — Practical Projects***
- * Complete Web Application Security Assessment
- * API Security Assessment
- * Network Security Assessment
- * OSINT Investigation
- * Python Security Automation
- * AI-assisted Security Analysis
- * Professional Penetration Testing Report
- *  **Course Outcome:*** শিক্ষার্থী Web Application, API, Network, OSINT, Python Automation এবং AI-assisted Cyber Security workflow-এর উপর professional practical skill তৈরি করতে পারবে।

COURSE 3: CyberTech Elite Cyber Security & AI Red Team Program

***ফি:* ₹1,50,000**

***উদ্দেশ্য:* Advanced Industry-Oriented Master Program with Mentorship + Advanced Labs + Real-World Security Workflow + Capstone Projects |**

*** *Phase 1 — Advanced Cyber Security Foundation***

*** Advanced Networking & Advanced Linux**

*** Windows Security Fundamentals & Active Directory Fundamentals**

*** Authentication Architecture & Identity & Access Management (IAM)**

*** Enterprise Security Architecture**

*** *Phase 2 — Advanced Reconnaissance***

*** Enterprise Reconnaissance & Attack Surface Discovery**

*** Advanced OSINT & Subdomain Intelligence**

*** Cloud Asset Discovery Concepts & Technology Fingerprinting**

*** Automated Recon Pipelines & Recon Data Analysis**

*** *Phase 3 — Advanced Web Application Security***

*** Advanced Authentication & Authorization Testing**

*** Access Control & Session Management**

*** Advanced SQL Injection, Advanced XSS, SSRF, XXE, SSTI Concepts**

*** File Upload Vulnerabilities, Path Traversal, Command Injection**

*** Business Logic Testing & Race Condition Concepts**

*** API Security & GraphQL Security Fundamentals**

*** *Phase 4 — Advanced API Security***

*** REST API Architecture**

*** Authentication, JWT Security, OAuth Concepts**

- * API Authorization, Rate Limiting, Input Validation**
- * API Misconfiguration & API Enumeration**
- * API Security Testing Methodology**
- * *Phase 5 — Active Directory Security (Authorized Lab/Environment)***
- * Windows Domain Concepts & Active Directory Architecture**
- * Users & Groups, Kerberos Fundamentals, LDAP, Group Policy**
- * Privilege Concepts & Security Assessment Methodology**
- * AD Attack-Surface Analysis & Detection & Hardening Concepts**
- * *Phase 6 — Cloud Security Fundamentals***
- * Cloud Security Architecture**
- * AWS Security Fundamentals & Azure Security Fundamentals**
- * IAM, Storage Security, Network Security**
- * Cloud Misconfiguration, Logging & Monitoring**
- * Cloud Security Assessment Methodology**
- * *Phase 7 — Red Team Concepts***
- * Red Team Methodology & Threat Modeling**
- * Attack Lifecycle**
- * Initial Access Concepts, Privilege Escalation Concepts, Lateral Movement Concepts**
- * Persistence Concepts, Command & Control Concepts, Detection Evasion Concepts**
- * Operational Security & Red Team Reporting**
- * *Phase 8 — Blue Team & Detection***
- * SOC Fundamentals & SIEM Concepts**
- * Log Analysis (Windows Event Logs, Linux Logs)**

- * Network Monitoring, IOC & Threat Intelligence**
- * Incident Response & Detection Engineering Fundamentals**
- * Security Hardening**
- * *Phase 9 — Malware & Reverse Engineering Fundamentals***
- * Malware Concepts & Sandbox Concepts**
- * Static & Dynamic Analysis Fundamentals**
- * File Analysis, Hashing & Indicators of Compromise (IOC)**
- * Safe Malware Analysis Lab & Defensive Malware Analysis**
- * *Phase 10 — Digital Forensics Fundamentals***
- * Digital Evidence, Disk Forensics & Memory Forensics Concepts**
- * Log Investigation, Timeline Analysis & Browser Forensics**
- * Incident Investigation & Forensic Reporting**
- * *Phase 11 — Python + Automation***
- * Advanced Python & Security Automation**
- * API Integration & Networking Automation**
- * Data & Log Processing**
- * Recon Automation & Custom Security Utilities**
- * Automated Security Reporting**
- * *Phase 12 — AI-Powered Cyber Security***
- * LLM Fundamentals & Prompt Engineering**
- * AI-assisted Security Research, Code Review & Log Analysis**
- * AI-assisted Threat Intelligence & Vulnerability Analysis**
- * RAG Concepts & Security Knowledge Base**
- * AI Security Automation, Hallucination Verification & Responsible AI Usage**

*** *Phase 13 — Professional Penetration Testing***

*** Authorized Lab Workflow: Recon → Enumeration → Vulnerability Assessment → Validation → Risk Analysis → Remediation Recommendation → Professional Report**

*** *Phase 14 — Capstone Projects***

*** *Project 1:* Web Application Security Assessment**

*** *Project 2:* API Security Assessment**

*** *Project 3:* Enterprise Network Security Assessment**

*** *Project 4:* AI Cyber Security Assistant**

*** *Project 5:* Final Red/Blue Team Simulation (Authorized Enterprise Lab)**

★ *Elite Program-এর অতিরিক্ত সুবিধা:*

*** দীর্ঘমেয়াদি Personal Mentorship**

*** Advanced Practical Lab Access**

*** Capstone Projects & Project Portfolio Building**

*** Professional Report Writing & Interview Preparation**

*** Cyber Security Career Guidance**

*** Freelancing/Bug Bounty Ethical Workflow Overview**

*** Regular Assessment, Final Practical Examination & Project Presentation**
