

**CYBERTECH**

## **AI-Based Data Analysis Course-**

# **CyberTech AI-Based Data Analysis Course**

**Python + Excel + SQL + Power BI + AI + Real Business Projects**

---

**BASIC — ₹15,000**

### **AI-Based Data Analysis Foundation**

**উপযুক্ত: Beginner, Student, চাকরিপ্রার্থী**

### **Syllabus**

#### **১. Data Analysis-এর ভিত্তি**

- **Data কী এবং Data Analysis কী?**
- **Structured ও Unstructured Data**
- **Data Analyst-এর কাজ**
- **Business Data থেকে সিদ্ধান্ত নেওয়া**
- **Data Cleaning-এর ধারণা**

#### **২. MS Excel for Data Analysis**

- **Excel Interface & Essential Functions**
- **Formula & Functions**
- **IF, SUMIF, COUNTIF, XLOOKUP**

- **Sorting & Filtering**
- **Conditional Formatting**
- **Data Validation**
- **Pivot Table**
- **Pivot Chart**
- **Excel Dashboard**

### ৩. Python Basics

- **Python Installation & Environment**
- **Variables & Data Types**
- **Conditions**
- **Loops**
- **Functions**
- **List, Tuple, Dictionary**
- **File Handling**

### ৪. Python Data Analysis

- **NumPy**
- **Pandas**
- **CSV/Excel Data Import**
- **Data Cleaning**
- **Missing Data**
- **Duplicate Data**
- **Filtering & Sorting**
- **Grouping & Aggregation**

### ৫. Data Visualization

- **Matplotlib**
- **Basic Charts**
- **Bar Chart**
- **Line Chart**
- **Pie Chart**
- **Histogram**
- **Data থেকে Pattern খুঁজে বের করা**

### ৬. AI দিয়ে Data Analysis

- **AI দিয়ে Data বুঝে নেওয়া**
- **AI-assisted Excel Formula**
- **AI-assisted Python Coding**
- **Data Cleaning-এ AI ব্যবহার**
- **AI দিয়ে Basic Data Insights তৈরি**

## Basic Outcome

কোর্স শেষে শিক্ষার্থী:

- Excel-এ Data Analysis করতে পারবে
  - Python + Pandas দিয়ে Data Process করতে পারবে
  - Basic Chart ও Dashboard তৈরি করতে পারবে
  - AI ব্যবহার করে Data Analysis-এর কাজ দ্রুত করতে পারবে
  - ছোট বাস্তব Data Analysis Project তৈরি করতে পারবে
- 

## ADVANCED — ₹35,000

**Professional AI-Based Data Analyst**

উপযুক্ত: Student, Graduate, চাকরিপ্রার্থী, Working Professional

### Syllabus

#### ১. Advanced Excel

- Advanced Excel Functions
- XLOOKUP / INDEX-MATCH
- Advanced Pivot Table
- Data Cleaning
- Power Query
- Data Transformation
- Interactive Dashboard
- KPI & Business Metrics

#### ২. Advanced Python

- Advanced Python Programming
- NumPy
- Pandas
- DataFrame Operations
- Advanced Data Cleaning
- Data Transformation
- Merging & Joining Datasets
- Date & Time Analysis
- Automated Data Processing

## 7. SQL for Data Analysis

- Database Fundamentals
- SQL Queries
- SELECT
- WHERE
- GROUP BY
- ORDER BY
- JOIN
- Subquery
- Aggregate Functions
- CASE
- CTE
- Window Functions
- Business Data Queries

## 8. Statistics for Data Analysis

- Mean, Median, Mode
- Variance
- Standard Deviation
- Percentage & Ratio
- Correlation
- Distribution
- Outlier Detection
- Basic Statistical Interpretation

## 9. Power BI

- Power BI Interface
- Data Import
- Power Query
- Data Cleaning
- Data Modeling
- Relationships
- DAX Fundamentals
- Calculated Columns
- Measures
- KPI
- Interactive Dashboard
- Power BI Reports

## 10. Advanced Data Visualization

- Professional Charts

- Interactive Reports
- Dashboard Design
- Storytelling with Data
- Finding Trends & Patterns
- Business Insights

## ৭. AI for Data Analysts

- AI-assisted Data Cleaning
- AI-assisted SQL Query Generation
- AI-assisted Python Analysis
- AI দিয়ে Excel Formula তৈরি
- AI দিয়ে Data Interpretation
- AI দিয়ে Report Generation
- AI দিয়ে Dashboard Ideas
- AI-এর Output যাচাই ও ভুল শনাক্তকরণ

## ৮. Real-World Projects

- Sales Data Analysis
- Customer Data Analysis
- Business Performance Dashboard
- Marketing Campaign Analysis
- Employee Data Analysis
- E-commerce Data Analysis

## Advanced Outcome

কোর্স শেষে শিক্ষার্থী:

- Excel + SQL + Python + Power BI ব্যবহার করে Professional Data Analysis করতে পারবে
- Raw Data থেকে Dashboard ও Business Insight তৈরি করতে পারবে
- Real-world Dataset নিয়ে কাজ করতে পারবে
- AI ব্যবহার করে Analysis Workflow দ্রুত করতে পারবে
- Portfolio-এর জন্য একাধিক Project তৈরি করতে পারবে

---

 **PRO — ₹1,50,000**

**AI-Powered Professional Data Analytics + Advanced Projects**

উপযুক্ত: Serious Career Builder, Professional, Business Analyst, Freelancer, Advanced Learner

## Syllabus

### ১. Advanced Excel & Automation

- Advanced Excel
- Power Query
- Advanced Pivot
- Dynamic Dashboard
- Data Automation
- Excel + AI Workflow
- Business Reporting Automation

### ২. Advanced Python for Data Analytics

- Advanced Python
- NumPy
- Pandas
- Advanced Data Cleaning
- Data Transformation
- Data Pipeline Concepts
- Automated Data Processing
- Python-based Reporting

### ৩. Advanced SQL

- Complex Queries
- Multiple Table JOIN
- Subqueries
- CTE
- Window Functions
- Advanced Aggregation
- Query Optimization Concepts
- Real Business Database Analysis

### ৪. Advanced Statistics

- Descriptive Statistics
- Probability Fundamentals
- Distribution

- Correlation & Regression Concepts
- Hypothesis Testing Concepts
- Statistical Interpretation
- Business Decision Making

## ৫. Power BI Professional

- Advanced Power Query
- Data Modeling
- Star Schema
- Advanced DAX
- Time Intelligence
- Advanced Measures
- KPI Dashboard
- Interactive Reports
- Drill-down & Drill-through
- Professional Dashboard Architecture

## ৬. AI-Powered Data Analysis

- Generative AI for Data Analysts
- AI-assisted Python Analysis
- AI-assisted SQL
- AI-assisted Excel
- AI-assisted Power BI
- Prompt Engineering for Data Analysis
- AI-based Data Cleaning
- AI-based Data Interpretation
- AI-generated Reports
- AI দিয়ে Automated Analysis Workflow
- AI Output Validation
- Responsible AI & Data Privacy

## ৭. Business Intelligence

- Business KPI
- Sales Analytics
- Marketing Analytics
- Customer Analytics
- Financial Data Analysis
- Operational Analytics
- HR Analytics
- E-commerce Analytics

- Decision Support Dashboard

## b. Advanced Analytics Projects

### Project 1 — E-commerce Analytics

- Sales Analysis
- Customer Analysis
- Product Performance
- Revenue Trends
- Profit Analysis
- Interactive Power BI Dashboard

### Project 2 — Marketing Analytics

- Campaign Performance
- Customer Acquisition
- Conversion Analysis
- ROI Analysis
- Marketing Dashboard

### Project 3 — Business Intelligence

- Company Performance Analysis
- KPI Tracking
- Regional Performance
- Product Analysis
- Management Dashboard

### Project 4 — Customer Analytics

- Customer Segmentation
- Purchase Behaviour
- Customer Retention Analysis
- Customer Lifetime Value Concepts

### Project 5 — Healthcare Data Analysis

- Patient Dataset Analysis
- Basic Healthcare KPIs
- Trend Analysis
- Dashboard Development

### Project 6 — AI Data Analysis Project

একটি বাস্তব **Dataset** নিয়ে:

**Raw Data → Cleaning → SQL/Python → AI Analysis → Power BI Dashboard → Business Report**

---

## **PRO Course-এর বিশেষ অংশ**

### **Portfolio Development**

- Professional Data Analyst Portfolio
- GitHub Project Management
- Project Documentation
- Data Analysis Report
- Dashboard Presentation

### **Interview Preparation**

- Data Analyst Interview Questions
- SQL Practice
- Excel Practical Test
- Python Data Analysis Test
- Power BI Practical Test
- Project-based Interview Preparation

### **Freelancing Preparation**

- Data Analysis Service কীভাবে তৈরি করবেন
  - Client Requirement বোঝা
  - Data Analysis Project Workflow
  - Professional Report তৈরি
  - Client Presentation
  - Project Documentation
- 

## **তিনটি প্যাকেজের পার্থক্য**

| বিষয়                 |  Basic<br>₹15K |  Advanced<br>₹35K |  Pro<br>₹1.5L |
|-----------------------|-------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Excel                 |                | Advanced                                                                                           | Professional                                                                                     |
| Python                | Basic                                                                                           | Advanced                                                                                           | Advanced                                                                                         |
| Pandas/NumPy          |                |                   |               |
| SQL                   | —                                                                                               |                   | Advanced                                                                                         |
| Statistics            | Basic                                                                                           |                   | Advanced                                                                                         |
| Power BI              | Basic                                                                                           | Professional                                                                                       | Advanced                                                                                         |
| DAX                   | —                                                                                               | Basic                                                                                              | Advanced                                                                                         |
| AI Data Analysis      | Basic                                                                                           | Advanced                                                                                           | Professional                                                                                     |
| Automation            | —                                                                                               | Basic                                                                                              | Advanced                                                                                         |
| Business Analytics    | —                                                                                               |                 | Advanced                                                                                         |
| Real Projects         | 2-3                                                                                             | 5+                                                                                                 | 6+                                                                                               |
| Portfolio             | Basic                                                                                           |                 | Professional                                                                                     |
| Interview Preparation | —                                                                                               | Basic                                                                                              | Advanced                                                                                         |
| Freelancing           | —                                                                                               | Basic                                                                                              | Advanced                                                                                         |
